ProSolver®

**A culture of using
Lean Six Sigma every day
and an alternative approach
to Deployment**

Introduction

ProSolver is an activity aimed at improving both the quality and speed of daily problem solving and is intended for use by all employees throughout an organisation. Based upon simple Lean Six Sigma methods it empowers all employees to be able to solve simple problems 'at their desk'. As employees will have this as a common language for problem solving, it is an opportunity for all areas of the organisation to get involved and an excellent foundation for teamwork both within and between different areas of the business.

Key features

- **Easy to understand and use**
- **Provides a 5-step discipline, with associated thinking for each step**
- **Based upon Lean Six Sigma and, as you learn, skills can be added to**
- **The standard choice for lower risk problem resolution**
- **Flexible and can meet the variety of problems across the organisation**

ProSolver culture

To empower staff.
To equip employees with the ability to solve problems with one methodology, one common language, one tool. To create a problem solving culture.
To change the way problems are approached. To engage employees. To work proactively. To change the way of thinking. To enable continuous improvement. To create champions, advocates. To solve everyday problems. To be a catalyst for solving wider problems. To solve as individuals. To solve as a team. To solve across boundaries. To be professional. To be proactive. To be productive.

This is ProSolver.
Let's solve problems.

ProSolver and the Lean Six Sigma organisation structure
